Absent: Griffin, Reynolds—2.

Mr. King, Mr. Green, and Mr. Moles were also in attendance.

It was moved and supported that the minutes of February 24, 1966 be approved.

It was moved by Rosa and supported by Ramey that the Board recommend to the City Council that the city retain Johnson, Johnson and Roy, Inc. as the consultant for designing the Washington Avenue mall.

Motion carried unanimously.

Mr. Ramey, Chairman of the Community Renewal Program Committee, reported that the Committee had met with the C.R.P. Coordinator, David F. Machtel, Jr. and Mr. Harry Adley, C.R.P. Consultant. He stated that Mr. Adley is reviewing the C.R.P. application with the staff to suggest what amendments or revisions are desirable.

It was moved by Rosa and supported by Ramey that parcels 8-4, 8-5, 8-6, and 5-11 be recommended to the City Council for approval to purchase for the amount of \$198,500. City Council approval is also requested to recommend the purchase of the irremovable fixtures on parcels 8-5 and 8-6 and approve payment to the property owners in an amount not to exceed \$10,882.

Motion carried unanimously.

Mr. Folkers reported to the Board the reasons for the Federal rejection of the proposed amendment to Project No. 1 to include the Poxson property located at 206-208 E. Michigan Avenue. He stated that since the building is not substandard, the Administrator in Chicago would not be able to sign the statement required in the Housing Act of 1964, which would require certification that the building's acquisition is necessary to carry out the urban renewal plan and is not capable of rehabilitation. He also stated that the inclusion of this property might be considered in the future if a Project is submitted for the area South of Michigan Avenue since it then would be considered as part of a Project and not a revision of the Project boundary to include one standard structure.

OFFICIAL PROCEEDINGS OF AIR POLLUTION CONTROL BOARD OF THE CITY OF LANSING

Proceedings, July 27, 1966

The regular meeting of the Air Pollution Board was held Wednesday evening, July 27, 1966, at 7:30 p.m., in Room G-30, City Hall.

Present: Board Members Bintz, Dodson, Kloeckner, Ray, Ruth, Tableman and Tamer —7.

Absent: Board Member Oeming—1.

Guests: Mr. Ellsworth and others representing Centrifuse, Inc.; Mr. McKinstry and others representing Fisher Body; B. D. Bloomfield, Michigan Dept. of Health; Wm. J. Duchaine, State Journal and many interested citizens.

The meeting was called to order by Chairman Tableman. The secretary announced the presence of a quorum. It was moved by Mr. Ruth, seconded by Mr. Kloeckner, that minutes of the June meeting be approved as printed. Motion carried.

Mr. Tableman presented a letter from B. D. Bloomfield, Michigan Department of Health, regarding Centrifuse, Inc. (with copies for members of the Board) to be placed on file. He then asked for a progress report from the company. Mr. Ellsworth spoke for the company. He reported on changes in the plant including installation of a new cupola which they had hoped would help the problem because of a larger volume of air. This has not been the case. The consulting firm they have hired has asked that certain procedures be carried out to enable them to conduct a study. The plant is down this week but everything will be ready for the study to begin when the plant goes back into production on August 1. Mr. Ford Caesar, High Street

School, spoke in behalf of the many citizens in attendance. He also presented specimens collected by Mrs. Ziegler. Mr. Swift presented a specimen collected from the top of his car. Mr. Tableman commented on the problems involved in interpretation and enforcement of the city air pollution ordinance and regarding the new state air pollution control act. Several citizens spoke. In responses to Mr. Tamer's question, Mr. Ellsworth indicated that he certainly hoped they would have the results of the consulting firm's study by our next meeting. Mr. Tableman asked the company to appear at that time.

Mr. Pesterfield reported on a petition regarding Demmer Engineering, Liquid Glaze and Motor Wheel. His investigation indicated Demmer and Liquid Glaze not involved. Motor Wheel needs to treat the May Street parking lot. Mr. Ellsworth indicated that the property had been sold to Liquid Glaze. Mr. Ray said that the lot would be treated.

Mr. Pesterfield reported that while attending the Air Pollution Control Association meeting in Los Angeles he had contacted representatives of the Los Angeles Air Pollution Department. They do not have a solution for the air pollution problem resulting from paint fume emission at General Motors plants in that city. They stated that they did not know anyone who did. They propose to eliminate the complaints by limiting the amount of emission from the stack (necessitating limitation on the amount of material used per hour). Engineering recommendations have been submitted to their Board but Mr. Pesterfield has not learned the Board's decision as yet.

The engineer reported new complaints regarding Davison Chemical. The new cyclones have been installed on the granulation unit. He has not had an opportunity to investigate since the complaint was received.

Mr. Pesterfield reported that West Side Gravel has applied some chloride, as he requested, but he has received more complaints. He will recheck to see whether further chloride application will give relief.

Mr. Pesterfield reports that he revisited Capital Laundry. They have installed a gas unit which is operating very well. The neighborhood is pleased. Mr. Pesterfield recommends discharge of the complaint. It was moved by Mr. Bintz, seconded by Mr. Dodson, that the Board concur in the recommendation of the engineer. Motion carried.

There have been complaints of odors between 8 and 9:30 p.m. from the Sewage Disposal Plant. Mr. Pesterfield has not

been able to investigate to date but will report at the next meeting.

Mr. Tableman called attention to approval of the Board of Water and Light's request to build an incinerator. They have incorporated changes recommended by the Air Pollution Board.

The next meeting will be held Wednesday evening, August 31, 1966, at 7:30 p.m., in Room G-30 of the City Hall.

It was moved by Mr. Dodson, seconded by Mr. Tamer, that the meeting be adjourned. Motion carried.

The meeting was adjourned at 8:50 p.m.

Their new equipment has been in operation since September 1 but at the present time is not functioning properly. Equipment representatives have been trying to correct the situation. They are presently recirculating water from the wet scrubbers. Mr. Pesterfield feels they may have to discontinue this practice and use only clean water. He recommends that we withhold action until the company has an opportunity to

correct the problem. Mr. Tableman ordered the complaint carried until next meeting.

The West Side Gravel is continuing to chloride but it is an almost continuous process because of the nature of their operations. Mr. Pesterfield recommends that the complaint be closed. It was moved by Mr. Bintz, seconded by Mr. Dodson, that the Board concur in the recommendation of the engineer.

Motion carried.

The engineer reports that he has visited the Sewage Disposal Plant ten times and still has found no basis for the complaint. He recommends closing the complaint. It was moved by Mr. Ray, seconded by Mr. Dodson, that the Board concur in the recommendation of the engineer.

Mr. Pesterfield reported that Centrifuse has been in violation again several times. He feels use of dirty scrap is contributing to the problem. The Board instructed him to contact Mr. Engle regarding these violations and also the flames which are visible from the top of the stack.

Davison Chemical still has not been able to contact manufacturers' representatives regarding ineffective operation of their new equipment.

Mr. Pesterfield reported a complaint regarding Simon Iron and Steel. He has investigated and could find no evidence to justify the complaint. He has contacted the Fire Marshal who informed Mr. Pesterfield that Simon Iron and Steel does not have a burning permit and that his investigation revealed no basis for the complaint either. Mr. Pesterfield recommends closing the complaint. The Board instructed the secretary to inform the City Clerk of this fact with copies to the Fire Marshal and the complainant. If the complainant can further identify the source of the problem, Mr. Pesterfield will investigate further.

Liquid Glaze reports that the parking lot in question has been treated. The engineer recommends holding this complaint in abeyance till spring pending possible recurrence.

Mr. Pesterfield reported attendance at the Air Pollution Conference at Oakland University. It was an excellent meeting with attendance of 125. They are evaluating the Conference prior to a decision as to whether this should become an annual affair.

State Air Pollution regulations are still being studied. Mr. Pesterfield believes they will be issued by January 1.
